Materials Science and Technology

Controlling matter.

Introduction
UTT graduates majoring in Materials Science and Technology (MTE) benefit from a pluridisciplinary training in scientific, technological, economic and environmental fields. They play a key role at service interfaces. Their mission consists of dimensioning, characterizing, selecting and implementing materials, with an overarching approach to comply with industrial and social constraints.

UTT-MTE offers 3 specialties focusing on processing matter, ranging from procurement to transformation and recycling.

• Economics of materials and the environment (EME) : implementing eco-design, material life cycle analysis and recycling to prioritise environment compliance for manufacturing processes.
• Material and component technology and trade (TCMC) : controlling choice and use of materials in a given economic environment taking into account technological and economic constraints.
• Material transformation and quality assessment (TQM) : developing innovative materials (composites, nanomaterials, surface treatment compounds) thanks to proficiency in regard to physico-chemical properties of materials.

Professional opportunities in a variety of sectors
• Aerospace
• Automobile
• Nuclear power
• Life cycle analysis, environmental compliance certification
• Construction
• Metallurgy, plasturgy
• Material procurement

Stakes

The UTT is authorised by the CTI to deliver the engineering degree.

More information here

Audience
Prerequisites for enrolment
- Bac
- Bac +1
- Bac +2

Internship(s)
Yes, Compulsory

Rhythm
- Full time
- With blocked release periods

Information
Université de Technologie de Troyes
Service des admissions et de la vie étudiante
12 rue Marie Curie, CS 42060
10004 Troyes cedex

What's next ?

Level of education obtained after completion

• Bac +5

Further studies

• Double degree at the UTT;
• Phd studies
programme

Generic courses

- Physico-chemical properties of materials
- Material characterisation and processes
- Project management and social sciences
- The environment
- Economics
- Transformation
